

# Quality Policy

**H-Energy** Quality Policy focuses on the continual enhancement of the quality by implementing the high-level national and international standards applicable to all H energy business processes.

The quality of all **H-Energy** business processes are continually improved, measured, evaluated and validated for effectiveness both internally and externally by the implementation and maintenance of **Quality Management System**.

**H-Energy** is strongly committed to the following quality principles:

- Striving to provide products and services that meet the highest quality standards;
- Striving to meet all applicable national and international requirements and Quality Standards;
- Ensuring sustainable quality performance through the implementation of effective Quality Management Systems compliant with ISO 9001:2015;
- Validating the effectiveness of the company's Quality Management System through internal audit processes;
- Continuing to build quality capability through training and awareness that develop technical qualifications, increase awareness, and manage risk in order to achieve improving levels of excellence;
- Engage relevant personnel in setting quality objectives for each business process;
- Setting Quality Objectives to ensure continual improvement and measure performance against the quality objectives;
- Identify risks and opportunities for enhancement of effectiveness of **Quality Management System** and achieving improved performance;
- Being committed to communicate the company's quality objectives across **H-Energy**;
- Periodically review the Quality objectives to ascertain its current relevancy to the processes and organization and revise where necessary for continual improvement.

Responsibility of implementation and compliance to this policy lies with the Chief executive, Directors, Senior Managers and their staff.

**Darshan Hiranandani**
